Detailed Action

1.) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2.) Claims 1-9, 11-19, and 21-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-36 of U.S. Patent No. 6,329,636 (cited by applicant) taken with Church et al. (6,023,037, cited by applicant) or over claims 1-35 of U.S. Patent No. 6,815,639 taken with Church et al. (6,023,037, cited by applicant). Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to have provided the claimed subject matter of either patent 6,329,636 or 6,815,639 with power factor correction as claimed in view of the teachings of Church et al. (6,023,037) that such is advantageous in a switching mode welding power supply (see element 20 in Church et al. (6,023,037) and the discussion thereof).

3.) Claims 37-98 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-36 of U.S. Patent No. 6,329,636 (cited by applicant) or over claims 1-35 of U.S. Patent No. 6,815,639. Although the conflicting claims are

Art Unit: 1725

not identical, they are not patentably distinct from each other because they are broader than the patented claims and are therefore obvious thereover.

4.) If applicant files a terminal disclaimer to overcome the obviousness type double patenting rejections above, he is reminded that he must disclaim both patents nos. 6,329,636 and 6,815,639.

5.) Applicant's arguments filed 2/16/2005 have been fully considered but they are not persuasive. Applicant's amendment to claim 87 overcome the rejection under 35USC112 of claims 87-91. Applicant states that he has filed a terminal disclaimer to overcome the obviousness-type double patenting rejections. However, no terminal disclaimer has been received, and the obviousness-type double patenting rejections remain in effect.

6.) **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1725

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
